MATERIALS:

- Chassis is of a steel and wood construction supported on purpose made jacks with 18mm plywood floor boards finished with either 2mm Vinyl rollout or hard wearing carpet tiles.
- Wall Panels are 40mm thick EPS clad with 0.4mm pre-painted Chromadek steel fitted together with tongue in groove system.
- Panels are secured with either Aluminium extrusions or galvanised steel and fastened with Aluminium blind rivets.
- Roofing for units less than 3m wide is constructed from 40mm wall panels with a central pitch and 100mm overhang maintaining the thermal insulation. For units over 3m wide the roof is constructed from IBR profile sheet supported by a steel roof truss system.
- The ceiling is then constructed from the standard 40mm thick wall panel to maintain thermal insulation.
- Windows are the Aluminium casement type made with 4mm glass and with one top hung opener each and an aluminium profile burglar proofing as standard.
- Doors are manufactured using the same material as the walls. External doors are fitted with weatherboards, door stoppers, retaining hooks and a 3 lever mortice lock.
- Internal doors are fitted with 2 lever mortice lock.
